

Airframe®

Plastic stacking frame (not only for Euro pallets)

The clean alternative

Individual printing

Other colours on request

Individual dimensions

Reinforcement
by inserting iron
(extra load of up to 1200kg)

Smooth interior
and exterior walls.

The Airframe is also available with 6 hinges
(M-folding), which can be folded on a Euro
pallet for return transportation.

- For certain goods, it is an affordable and flexible alternative to other types of storage, transport and packaging.
- The Airframe® is characterised by a wide range of possible uses and easy handling.
 - 45% less weight compared to wooden frames.
- Our plastic stacking frames are a hygienic and light alternative to wooden stacking frames.
- The advantages are their low tare weight that does not change when stored outdoors, as well as smooth surfaces that can be cleaned easily.

Thanks to their corner hinges, they can be stacked on top of each other at any height, and due to the Airframe's low tare weight, several frame units can be stacked on top of one another quickly and easily for the required useable height.

In addition, the diagonally foldable version with galvanised corner hinges saves a lot of space with empty shipping or when stored.

In addition, a sign in the form of a company logo or inscriptions such as a proprietary notice can be applied around the packaging unit to make it visually appealing. Optionally, the Airframe is available in many colours.

All stacking frames can be piled up on top of each other adjustably. Frames with 4 corner hinges can be folded diagonally.

The 6-hinge version (2 additional middle hinges – available with a size larger than 600 x 800mm) can be folded according to the respective pallet size and saves space.
