

# ThorPak® Buckle

Here, the bottom of the box or the lids can be closed with one simple operation. Adhesive tape is not required anymore.

The ThorPak® buckle is a multi-purpose solution, mainly for cardboard packaging.

Anchor

Anchors can optionally be used to secure the buckle to the box, e.g., when returned folded. Moreover, they can be used to allow cardboard boxes to manage heavier loads. Available in 2 different sizes.

You also profit from more safety at work as box cutters are no longer required to cut open the cardboard boxes.

Since the ThorPak buckle can be used as often as required, it really pays off, in contrast to the ongoing costs of adhesive tape, wear on cardboard boxes and, not forgetting, the additional costs for handling.
