ThorPak® Solution/Steel

These (foldable) large load carriers / steel frames are particularly suitable for transportation of sensitive components. In combination with pocket systems, foam inlays, compartments, textile pockets, deep-drawn intermediate layers and tooth strips, this system can be used extremely flexible and versatile.

ThorPak® features

- ❶ Cover made of Aircell with hinge
- ❷ Pallet, TwinSheet HDPE
- ❸ Container ring made of 10/3000 PP with individual print
- ❹ Storage compartments
- ❺ Numbered storage compartments with foldable curtain
- ❻ Individual compartments for moving
- ❼ Loading flap with hook-and-loop fastener
- ❽ Collision guard

Information

Top-Front-Loader

All storage compartments and compartments can be adjusted individually to the packed product.

- ❶ Cover SingleSheet HDPE riveted fixed with the ring
- ❷ Pallet SingleSheet HDPE riveted fixed with the ring
- ❸ Container ring made of 10/3000 PP with individual print
- ❹ Collision guard
- ❺ Front-Loader with storage compartments and foldable curtain

Front-Loader Light S 0806

All storage compartments and compartments can be adjusted individually to the packed product.

The components can be manufactured from various materials (even suitable for sensitive and components that are not scratch resistant).

- ❶ Cover, TwinSheet HDPE
- ❷ Pallet, TwinSheet HDPE
- ❸ Locator for locking the pallet with the container ring
- ❹ Front-Loader system without front panel (also available with removable front panel)

Front-Loader door panel Medium T 1210

Receptacles of the components in the textile system floor element exchangeable

ThorPak® features

Information

- 1 Wi-Sales collapsible frame can be mounted individually and customer-specific to every height in the container
- 2 Aircell® intermediate layers available in many different versions

Wi-Sales collapsible frame and Aircell® intermediate layers

- 1 Top-Loader-System
- 2 Pallet TwinSheet HDPE with locaters
- 3 Return ring in which the foldable ring and the compartment can be folded together for transport (sandwich system)
- 4 Full container ring with M-fold

Top-Loader-System

Textile compartment system with curtain

- 1 2 loading flaps
- 2 Tube system bolted with the container ring
- 3 4 levels, easy to move

Top-Loader with textile compartments

Option: foldable
Freely selectable access to the components.
Handling-optimized

- 1 Cover SingleSheet HDPE with hinge
- 2 Pallet SingleSheet with 2 steel reinforcements under the pallet
- 3 Special aluminum frame with foam compartments in order to guarantee the optimum transport of sensitive components

Top-Loader with foam compartments

ThorPak® features

Information

- ❶ 4 side panels, foldable
- ❷ Lockable flaps

Container with trolley
Can be folded in the middle

- ❶ Full goods container ring folds with textile
- ❷ Full goods ring mount and compartments with empty goods ring
- ❸ Reduced volume returns
- ❹ Textile compartments remain clean when folded

Top-Loader with textile compartments and curtain

- ❶ TP MT with large loading flap
- ❷ Foam glued onto the Aircell panel

Top-Loader
Foam on Aircell panels

- ❶ Removable front longitudinal side
- ❷ Steel beams anchored to the ring
- ❸ Reduced volume returns due to the folding

Top-Front-Loader
System 1208
with steel reinforcements for accommodating suspended components

- ❶ Standard system MT 1612 foldable
- ❷ Foam on HKP - all parts removable
- ❸ Scratch-resistant version

Top-Loader for sensitive components
Return transport (empty) with collected interior equipment in a standing box
(4 boxes folded together, 1 standing)
